

An observer is standing 50 yards from a maple tree and 30 yards from an oak tree in the park. His position is shown in the diagram at the right. If he is looking at the maple tree, he needs to turn his head  $120^\circ$  to look at the oak tree. How many yards apart are the two trees?

- A 58.3      B 65.2      C 70      D 75
